

Dan.

Meet our
quality system.
It's not ISO 9002.
Or M-1003.
It's Dan—
and the 48 other people
who care about the job
they do here. They don't
lace their work shoes
every morning just for
the money. They want
the opportunity to excel;
they take pride in what
they produce for you.

Dan worked his first four
months at ORX for free.
Just to show us what he could
do. Eleven years later, he's still as
eager as ever (although these days
he does take home a paycheck).
What Dan brought with him when
he started here is exactly what
all of our employees bring with
them to work every day.
Not just their lunch, but an *attitude*.
An attitude to do superior work.
All day.
Every day.
Just like Dan.
